

New CGI Project

Checklist

Fireplace Details:

- Reference photos showing the whole fireplace from front and side (taken with a camera phone is fine)
- Reference photos showing the entire fire and close-ups of any specific important details e.g. shaped glass
- Full dimensions/drawing of Fire and Fireplace (not just overall dimensions).
- Reference photos or description of the desired fuel bed
- Reference photos of any specific texture (e.g. Semi Rijo Limestone). Ideally one close-up image taken from a slight angle to show the depth and texture of the material and one showing the entire material in situ i.e. on a fireplace.

Room/Lifestyle Image Details:

- | | |
|--|---|
| <p>Option 1</p> <ul style="list-style-type: none"><input type="checkbox"/> Reference image of the room you would like us to recreate<input type="checkbox"/> Agree camera angle and distance from object (i.e. fireplace) | <p>Option 2</p> <ul style="list-style-type: none"><input type="checkbox"/> Reference images and/or mood board showing the style of the room you would like us to create<input type="checkbox"/> Agree camera angle and distance from object (i.e. fireplace) |
|--|---|

Notes/Reminders:

- *To start the project on time and to get off and running quickly it is important that we have all information and files before the project start date. We will share a link with you for uploading all files and documents.*
- *For larger projects (5+ Models/Rooms) we will require you to fill in a spreadsheet that gives details of each of the sub-projects i.e. each fireplace model, each texture change or each room etc.*
